## Capability Statement

PROPERTY

### Property

Experience.  
Quality.  
Reliability.

For 30 years DTK has been specialising in property development, engineering construction and sustainability projects. We develop property projects for ourselves and on behalf of clients. We consult and implement sustainability solutions for business. We have been working with some of Australia's biggest private and listed companies, as well as SME's, on value-focused assignments. Our Teams have considerable experience and are matched to suit the task whether that be in design, building or implementation. We can provide a tailored approach that will dovetail with your organisations goals and remain confident that we can add value to every step in the process.

# Our Experience

## Development Management

Bundaberg Toyota. Development Management for a new Motor Vehicle Showroom and Service Facilities in Bundaberg. This 2500m<sup>2</sup> facility with extensive external display and storage areas represents a good example of contemporary design.

## Property Development

Multi residential development of 11 3-level townhouses 5km from Brisbane CBD.

## Commercial Design and Construction

CSPC Nanhai Petrochemicals Project: Huizhou, China. Lead foundation engineer and contracting.

## Development Management

120 man Fly-in Fly-out workers camp comprising all services and procurement planning in a compressed timeframe. Argyle Diamond Mine, Australia.
